SECRETARIAT
Gen. & Rev. Depts.
-5 MAR 1920

Dated the 2nd day of ~~Feby~~ March 1920.

Sir,

Enclosed herewith we have the honour to forward on behalf of John Wells, an application under the Inventions and Design Regulation 1894, for leave to file a specification in respect of an invention for Improvements in Tar Extractors and Scrubbers for Gas

The documents sent comprise :- a Power of Attorney in our favour, and the Application with a description of the invention and Drawings.

A Patent for this invention in British India has been applied for, particulars of which are set out in the Application.

The fee of Rs 10/- payable on the Application and one rupee for the stamp duty on the Power of Attorney, are included in the Money Order for Rs 77/- being sent by same mail.

We have the honour to be,

Sir,

Your most obedient servants,

H. V. Williams & Co.

Registered
ENCLOSURES

Case 1

APPLICATION

To.

The Dewan of Mysore.

THE APPLICATION of JOHN WELLS of 36 Sharia Falaki, in the City of Cairo, Egypt, Consult Engineer for leave to file a specification under Part 1 of the Inventions and Designs Regulation, 1894.

The applicant is in possession of an invention for "Improvements in Tar Extractors and Scrubbers for Gas", he is the Inventor thereof; and to the best of his information and belief, the invention is new within the meaning of Part 1 of the Inventions and Designs Regulation, 1894; and no circumstance exists which, if the applicant be authorized to file a Specification and files it in accordance with that Part will disentitle him to an Exclusive Privilege thereunder in respect of the invention.

An application for a patent in British India was filed on 24th September, 1919, No.4871. See Gazette of India, Part II, Page 1756 dated 11th October 1919: and was accepted on 2nd February 1920. See Gazette of India, Part II, Page 220, dated 7th February 1920.

The following is the description of the invention:-

This invention relates to tar extractors, gas scrubbers and like apparatus for purifying gas.

According to this invention the tar-extractor comprises one or preferably a plurality of superposed extraction-chambers, preferably having central inlets and outlets, through which the gas to be purified is passed, and in each of which there is a series of paddles or vanes adapted to be rotated at a high speed on a vertical driving shaft. The paddles or vanes are preferably mounted on discs which serve as baffles for controlling the course of the gas, and which, together with the top and bottom walls of the extraction-chambers, are inclined downwards from their centre e.g. they are of conical or dished form, so that the gases to be purified, entering the bottom of the chambers at the central inlet, are driven outwards at a high velocity by the paddles at the lower sides of the discs, and then pass round the periphery of the paddle-disc and back to the central outlet, travelling against the centrifugal force, where they pass into the next extraction-chamber, and so on, the washing water falling on to the top of the rotary discs preferably near the centre thereof, and together with the tar and other liquid removed

from the gas, passing out through outlets in the peripheries of the chambers.

The several superposed chambers forming the purifying apparatus are preferably connected together by socket and faucet joints so as to permit the erection of the apparatus without recourse to machining.

In the drawing attached hereto, which is a vertical central section, the base A is a cylindrical casting or structure carrying a foot-step bearing B, supporting a spindle C with a further or upper bearing B' maintaining the spindle C in a vertical and central position in regard to the base A. The base is also provided with a sump or oil bath providing lubrications for the worm and worm-wheel F and E substantially as shown in the drawing.

In the upper part of the base an inlet for the gas is provided at G. The upper edge of the body A receives the first of the tar extraction chambers H, which is a casting fitting into the body A, on the principle of a spigot and faucet joint, the joint being made in the ordinary manner with asbestos cord or special cement. The tar extraction chamber H is provided with an outlet I for the discharge of water and tar extracted by the centrifugal force of the paddles J which are attached to a disc Q fixed to the spindle C, above the first of the

tar extraction chambers H.

Additional chambers together with their paddles J may be fitted so as to make the extraction take place in one or several stages as desired, each chamber H being built on the principle of a spigot and faucet or socket.

Above the upper tar extractor chamber H is a special chamber providing for the outlet L the support of the gas scrubber M and a passage N for the passing of the gas from the upper tar extraction chamber to the scrubber chamber M. The scrubber chamber M has a circular perforated plate O resting in special chamber K and the scrubber chamber M is jointed to the special chamber K with an ordinary spigot and faucet joint. The Scrubber chamber M is covered with a plate P and is filled with sawdust or other convenient material, for the final purification of the gas after its passage through the extractor chambers H,H.

The chambers H,H and discs Q,Q are of conical or dished form and are arranged with their convex surfaces uppermost so that water supplied through pipes R,R to the centre of the upper surfaces of the discs Q,Q will run down towards the periphery of the same and fall on to the lower wall of the chamber whence it drains into the outlets I.

The operation of my improved tar-extractor is as follows:-

The gas to be cleaned enters the extractor at G passing upwards into the chamber H where it turns on meeting the rotary disc Q and is forced outwards by the rapidly revolving paddles J; the gas then passes upwards through the paddles J on the top or upper side of the disc Q and into the next succeeding extractor chamber or chambers H,H.

In the passage of the gas on the upper sides of the discs Q a jet of water is introduced through the water service pipes R. The water and tar are allowed to escape through the tar outlets I, through suitable seals to prevent egress of the gases.

After passing through the last or upper stage of the extractor chambers the gases pass by way of the pipe N and thence downwards through the sawdust scrubber to the outlet L, from which outlet the gases are led by any suitable means to the engine or to other uses.

Having now particularly described and ascertained the nature of my said invention, and in what manner the same is to be performed, I declare that what I claim is:-

1. A tar extractor for gas comprising one or more superposed extraction-chambers through which the gas to be purified is passed in each of which there is a series of paddles or vanes adapted to be rotated at a high speed on a vertical driving shaft.

2. A constructional form of the tar-extractor claimed in claim 1, wherein the paddles or vanes are mounted on discs on the driving shaft.

3. A constructional form of the tar- extractor claimed in claim 1, wherein the paddle-discs and the upper and lower walls of the extraction chambers containing the same are made of conical or dished form the convex surfaces thereof being arranged upper-most.

4. A constructional form of the tar- extractor claimed in claim 3, wherein the extraction chambers are provided with central gas- inlets and outlets and

with peripheral outlets for tar and other liquids, substantially as described.

5. A constructional form of the extractor claimed in any of claims 1 to 4, wherein the superposed extraction chambers are connected together by spigot and faucet joints, substantially as described.

6. A constructional form of the extractor claimed in any of claims 1 to 5, wherein a scrubber is arranged on the top of the extraction - chambers, substantially as described.

7. The improved apparatus for purifying gas constructed substantially as here-in-before described with reference to the accompanying drawings for the purposes specified.

The applicant therefore, applies for leave to file a Specification of the invention pursuant to Part I of the Mysore Inventions and Designs Regulation, 1894.

Dated this 20th day of November 1919.

John Wells

I, JOHN WELLS, the applicant above named do declare that what is stated in this Application is true to my knowledge, except as to matters stated on information and belief, and as to those matters I believe them to be true.

POWER OF ATTORNEY

IN THE MATTER of the Inventions and Designs Regulation, XI of 1894, of the Government of Mysore:

and

IN THE MATTER of JOHN WELLS, of 36 Sharia Falaki, in the City of Cairo, Egypt, Consulting Engineer, an Inventor.

I, The above named JOHN WELLS, do hereby retain, constitute and appoint Messrs. H. V. Williams & Co, Patent Agents and Engineers, of 8 Esplanade East, Calcutta, British India, as my Agents and Attorneys to apply for and obtain from the Government of Mysore an Exclusive Privilege for "Improvements in Tar Extractors and Scrubbers for Gas" and to maintain the same in force; and I authorize them to sign my name to such papers and writings and do such acts regarding the same, including substitution and revocation, as may be necessary or expedient. And lastly, I request that all notices, requisitions and communications now or hereafter relating to the same may be sent to such Agents at the above address, and that they be recognized as my authorized Agents in all proceedings incident thereto.

Dated this 20th day of November 1919.

GENERAL DEPARTMENT.

Register No. 23 **of 1919-20.**

Bangalore, the 6/4/1920

WHEREAS an application, dated the 2nd March 1920 and received on the 5th March 1920, has been submitted under Section 5 of the Mysore Inventions and Designs Regulation, 1894, by Messrs H. V. Williams and Co. Calcutta, on behalf of Mr. John Wells of 36, Sharia Zelaki, Cairo, Egypt, by occupation, Consulting Engineer (hereinafter referred to as "the applicant") for leave to file a specification of an invention for "Improvements in tar extractors and scrubbers for gas" (Case I)

.....

.....

And whereas the applicant has duly complied with all the requirements of Section 5 of the said Regulation;

The Government of Mysore are pleased, under Section 6 of the said Regulation, to authorize the applicant to file a specification of the said invention in accordance with the provisions of the said Regulation.

ORDERED, that the applicant be, and he is hereby, informed accordingly.

Recd 30.3.20

By Order of the Government of Mysore,

27/3/20.

for Chief *Secretary to the Govt. of Mysore,*
~~*General Department.*~~

MA 26.3.20

Certified that the fees prescribed in the fourth schedule to the Mysore Inventions and Designs Regulation, 1894, in respect of the application for leave to file the said specification and of the filing thereof have been paid by the applicant, and that the specification hereinbefore described has been duly filed in accordance with the provisions of Section 8 of the said Regulation on this the Twelfth day of July 1920.

For Chief *Secretary to the Govt. of Mysore,*
General Department.

(Section 8 of the Inventions and Designs Regulation, 1894.)

8. (1) If within six months from the date of an order under Section 6, Sub-Section (1), or within such further time, not exceeding three months, as the Government of Mysore, in its discretion, may, on cause shown to its satisfaction and on payment of the fee prescribed in that behalf in the fourth schedule, see fit to allow, the applicant causes a specification of his invention to be filed in manner by this Part required, and the fee prescribed in the fourth schedule in respect of the filing of the specification to be paid, the applicant shall, subject to the other provisions of this Part, be entitled to the exclusive privilege of making, selling and using the invention in the Territories of Mysore, and of authorizing others so to do, for a term of fourteen years from the date of the filing of the specification.

(2) But an exclusive privilege in respect of an invention of a new manufacture shall, notwithstanding anything in Sub-Section (1), cease, if the inventor fails to pay, within the time limited in that behalf by the fourth schedule, any fee prescribed in that schedule in respect of the continuance of the privilege.

(3) If, nevertheless, in any case, by accident, mistake, or inadvertence, an inventor fails to pay any such fee within the time so limited, he may apply to the Government of Mysore for an enlargement of the time for making the payment.

(4) Thereupon the Government of Mysore may enlarge the time accordingly, on payment of the fee prescribed in that behalf in the fourth schedule, and subject to the following conditions, namely :—

(*a*) the time for making a payment shall not in any case be enlarged for more than three months ; and

(*b*) if any suit is instituted in respect of an infringement of the exclusive privilege committed after a failure to make a payment within the time limited for the making thereof and before the enlargement of that time, the Court disposing of the suit may, if it thinks fit, refuse to award or give any damages in respect of the infringement.
